The Bluetooth speakerphone for the car, office and the home.

Flexible- The KBT130B is more than a powerful Bluetooth speakerphone for use in the car.

Because of its excellent audio quality and voice pick-up you'll want to use it in the office and home too!

Convenient- The KBT130B rechargeable batteries give up to 3 hours of talk time and up to 500 hours of standby time between chargings. The KBT130B can be recharged from wall sockets or from the vehicle power charger in your car.

Smart - The KBT130B supports your phone's voice activated features as well as call answer and end from the multi-function button on the speakerphone. In addition, the KBT130B is equipped with volume control and mute button which are particularly useful for telephone conferencing and a headset port when privacy is required.

In the car- With no installation necessary, the KBT130B makes an ideal Bluetooth car kit. Its small, compact design and choice of mounting accessories mean the KBT130B can be securely positioned in the car wherever you find it most convenient. The speakerphone comes with two convenient car mounting accessories, a visor clip and a suction mount.

Its neutral color tones are designed to complement your car's interior color and finish.

In the office- Because the KBT130B is so lightweight and compact, it requires no external power source.

KBT130B new speakerphone is portable enough to travel with you to the office, meetings and the home.

The pivoting arm ensures that the microphone can be positioned for optimum voice pick-up and the volume of the 2 watt speaker can be adjusted so that even large groups in noisy surroundings can hear telephone conversations clearly.
