BLUETOOTH TINY HEADSET

P/N NHSTH2C2XXX

USER GUIDE

Declaration of Conformity.
We declare that product NHSTH2C2XXX conforms to the R&TTE Directive 1999/5/EC.

FCC ID: TNZNHSTH2C2XXX
CE 0678

GETTING STARTED

Remove all components from the package. Items in the pack include: Bluetooth headset with Ear Hook, Ear Cap, User Guide and AC Charger. Please check the contents carefully and contact your local dealer immediately if there are any shortages.

GETTING TO KNOW YOUR HEADSET

Please note some models of headset will differ slightly in style, color and the functionality may vary according to their specifications.

CHARGING YOUR HEADSET

Before using the headset, you must charge it for at least two hours. When fully charged, the battery provides up to 8 hours of talk time and up to 150 hours of standby time.

Please note that talk time is also a function of the mobile phone and factory determined settings of the phone, so you may find this figure is reduced under certain conditions.

To charge the headset

1. Plug the AC charger into the headset.
2. Plug the AC charger into a wall outlet. When the headset is charging, the amber LED will light up.
3. When charging has finished, the amber LED will turn off or be dim. Unplug the charger cable from both the wall outlet and also from the headset.

Battery Indication: The amber LED can turn off after less than 2 hours charging; this normally indicates that the headset can be used. However, for the initial charge, it is recommended that you charge the headset for at least 2 hours in order to fully prepare the battery for normal operation.

PAIRING THE HEADSET WITH YOUR MOBILE PHONE

Pairing is the process of linking the headset with your Bluetooth mobile phone. Before you use the headset with your mobile phone you must pair the devices. After this process has been completed, you can use the headset only with its paired mobile phone. If you wish to use the headset with a different mobile phone, you must repeat the pairing process with the new mobile phone. In this case, the headset will no longer work with the original mobile phone. **Please refer to the user manual of your mobile phone for further information on 'How to Pair'. Typically, you need to make your phone 'Discover' the headset by using a "Bluetooth", "Connect" or "Setup" menu then selecting an option to "Discover" other Bluetooth devices.**

To pair the devices

1. Before you pair the headset, ensure that the battery is fully charged. If the headset battery is low then amber LED will flash.
2. Set up your mobile phone to "Discover" your headset.
3. With the headset turned off, press and hold the Talk button for about 7 seconds until the blue and amber LEDs flash alternately or until you will hear the "PAIR" tone (the second of two tones).
4. Release the Talk button. The headset is now in Pairing Mode.
5. Initiate the device discovery feature on the mobile phone. Refer to the mobile phone user guide for instructions for initiating this feature.
6. When prompted by the mobile phone, enter the headset pin code which is **0000**. When pairing is complete, the blue LED on the headset will flash at three-second intervals and the headset will be placed in standby mode, ready to make and receive calls.

If disconnection or a lost link occurs, it may be due to the following reasons:

- a) The range is over 10 metres between the headset and the mobile phone.
- b) The mobile phone disconnected the link to conserve power or enable another function.
- c) Either device has been switched off.

Note: The headset, in normal operation, should maintain the connection with the mobile phone at all times once pairing has been successful and a connection has been established between the two devices.

To cancel pairing mode - While the headset is in pairing mode, you can cancel the pairing process and turn off the headset. Press and hold the Talk button for approx. 3 seconds. You will hear an "OFF" tone, the Amber LED will flash several times and the headset will turn off. Release the Talk button.

FITTING THE HEADSET ON YOUR EAR

The Headset is designed to fit comfortably in your ear. The ear hook can be fixed into the headset from both sides, allowing you to position on right or left ear. The ear hook can

be separated from the Headset by simply pulling the base of the ear hook away from the main body of the Headset. The ear hook can then be reinserted in the other direction for positioning on the opposite ear. The ear hook is flexible and can be bent to adjust the fit that is best for the individual user.
To replace the ear cap - Stretch the rubber ear cap around the end of the speaker until secure.

To place the headset on your ear - Place the headset speaker in your ear with the microphone angled towards your mouth. The headset should fit snugly in your ear.

SWITCHING ON YOUR HEADSET

To turn on the headset - With the headset turned off, press and hold the Talk button for about 5 seconds until you hear the "ON" tone (two ascending "beeps") or you see the Blue LED start to flash. Release the Talk button. The headset will turn on and enter standby mode, ready to make and receive calls. After turning on the headset, the headset will try to connect to the last paired/connected device automatically.

To turn off the headset - With the headset turned on, press and hold the Talk button for approx 3 seconds. You will hear an "OFF" tone (two descending "beeps") and the Amber LED will flash quickly several times. The headset will turn off and you can release the Talk button.

MAKING CALLS

You can make calls from your mobile phone, or directly from the headset using voice dialing commands (if this feature is supported by your mobile phone).

To make calls from your mobile phone - Dial the call from your mobile phone. Dependent on your mobile phone settings the call is automatically connected to your headset.

To make calls using VOICE DIALING (if supported by your mobile phone) - Click the Talk button on your headset. You will hear a Voice Dial tone possibly followed by the voice-dial prompt tone from your mobile phone. Speak the name of the person you wish to call. The call is automatically connected to your headset.

To make calls using LAST NUMBER REDIAL (if supported by your mobile phone) - While in standby mode, press and hold the Volume DOWN "-" button for about 3 seconds, and you will hear a "Last Number Redial" tone (single beep). Release the Volume DOWN "-" button, the call is automatically connected to your mobile phone.

RECEIVING CALLS

You must configure your mobile phone to answer calls directly on your Bluetooth headset. Refer to the mobile phone user guide for instructions on initiating this feature.

When you hear your headset ring, press the Talk button on the headset. The call is automatically connected to your headset.

Reject calls Please note you can also reject calls by depressing the Talk button for about 3 seconds. You will also hear a beep in addition to the incoming ringing when the call reject is about to occur (Not all phones support this feature).

ENDING CALLS

When you have finished your call, press the Talk button on your headset. The call will be disconnected.

TRANSFERRING CALLS

You can transfer calls connected to your headset back to your mobile phone, or from your mobile phone to your headset. (Not all phones support this feature)
 To transfer calls from your headset to the phone press and hold the Volume UP button for about 3 seconds until you hear the tone. To transfer from phone to headset either press and hold the Volume UP button again or (especially on Nokia phones) you may need to click the Talk button to get the call.

ADJUSTING THE VOLUME

To increase the volume - While on a call, press and release (click) the Volume UP button "+" to increase volume by 1 step. Repeat this procedure until you have reached the desired level.

To decrease the volume - While on a call, press and release (click) the Volume DOWN button "-" to decrease volume by 1 step. Repeat this procedure until you have reached the desired level.

MUTING THE HEADSET

You can mute and un-mute the microphone temporarily so that you cannot be heard by the connected party.

To mute the headset - While on a call, press and hold both the Volume UP button "+" and the Volume DOWN button "-" at the same time for about 3 seconds. You will hear a MUTE tone (Single beep), the microphone is muted.

To un-mute the headset - When microphone is muted, press and hold both the Volume UP "+" button and Volume DOWN "-" button at the same time for 3 seconds. You will hear the MUTE tone (Single beep), the microphone is un-muted.

VISUAL INDICATORS

Visual Indicators - 2 LEDs (blue and amber) indicate the status of the headset:

Status	Indication
Battery 2/3 full	Amber LED is off or dim
Battery low	Amber LED on instead of Blue LED
Headset off	All LEDs are off
Headset in standby mode, ready to make & receive calls	Blue LED flashes at 3 second intervals
Headset in pairing mode	Blue and amber LEDs flash alternately.

TROUBLE SHOOTING

Please note that you should also be familiar with the operation of your mobile phone and how to connect to Bluetooth devices. Please read your mobile phone user guide carefully. Please note that the Bluetooth headset will only work with Bluetooth mobile phones. For operation with a PC or laptop device please note that these devices should also be Bluetooth enabled with appropriate third party software in order to enable correct operation.

Symptom/Problem	Solution
When Talk button is pressed, no LED indicator	<ul style="list-style-type: none"> Unit not charged Consult authorized dealer
Headset powers on with blue LED flashing but no connection to mobile phone	<ul style="list-style-type: none"> Check unit is paired to phone. Check settings in phone. Headset default name is BTHS Check phone is switched on Check handsfree settings for phone Ensure headset & phone are within range
Headset does not charge	<ul style="list-style-type: none"> Check mains charger adapter is connected to the headset securely & is switched on Check AC charger is working using another device Consult authorized dealer
